

SUMMARY

I'm a fast-learning full-stack Web Developer with strong communication skills. After working in technical support, I found my passion for writing code and have been hooked ever since. I'm proficient in building RESTful web applications with JavaScript, jQuery, Angular.js, Ruby, and Ruby on Rails using Test Driven Development. I'm an enthusiastic problem solver with a compulsion to learn and grow.

EDUCATION

University of Iowa

BA Linguistics 2013

Graduated with Highest Distinction - GPA: 4.0

Bloc Apprenticeship

Full Stack Web Developer Apprenticeship
2017

TECHNICAL SKILLS

JavaScript, Angular.js, jQuery, Ruby, Ruby on Rails, HTML5, CSS3, Git, Bootstrap, SQL, Microsoft Access

RECENT PROJECTS

NextTask

To-do list app built with JavaScript, Angular.js, and Firebase. Designed to keep your to-do lists clean and realistic by removing items that are not completed within 7 days. Expired tasks are still available under the Expired list, but they are cleared from your Current list.

Open Chat

Instant messaging application built with JavaScript, Angular.js, and Firebase. Uses Firebase's AngularFire module to provide a real-time backend with three-way data binding. Includes user authentication and authorization.

Github Repo - github.com/dmhuebner/open-chat | **View Project** - openchat.netlify.com

Wikiport

Collaborative wiki sharing application built with Ruby on Rails that allows users to create public and private Markdown-based wikis. Features full user authentication/authorization and payment integration through the Stripe API.

Github Repo - github.com/dmhuebner/wikiport | **View Project** - wikiport.herokuapp.com

Post Maestro

Reddit-like application built with Ruby on Rails designed to let users share and explore posts and links from across the internet. Users can comment on public posts, use Markdown to style their posts and up-vote or down-vote posts they come across.

EMPLOYMENT

FRONTSTEPS

Senior Technical Support Representative

Denver, CO
Nov 2015 - Current

- Diagnose cause of reported technical issues, respond to client inquiries, and resolve any issues related to web-based HOA management software.
- Use HTML & CSS to assist clients with website content formatting and troubleshoot format/style related errors.
- Write SQL queries to make requested adjustments to client data, manually create client data records and more.
- Report/document software bugs and troubleshoot technical issues including email hosting, DNS records hosting, product use & functionality, 3rd party software integration and domain name registration.

MODIS

Technical Recruiter

Denver, CO
Oct 2014 - Jul 2015

- Responsible for identifying, qualifying, recruiting and interviewing exceptional technical candidates - predominantly Software Engineers, Application Developers, and Project Managers.
- Supported multiple, national strategic accounts within Modis including negotiating rates, setting up and preparing candidates for interviews, presenting and accepting offers on behalf of candidates, troubleshooting hiring issues, etc.
- Responsible for managing multiple client requisitions in a constantly changing, SLA driven environment as well as mentoring and training new and existing recruiters.
